RARUK Automation Ltd.

RARUK Automation are specialists in the supply of innovative automation products designed to enhance productivity across all industries.

From our collaborative and traditional industrial robots through to linear axis and controls, or complete turnkey solutions, our product programme allows us to provide OEM's, systems integrators and manufacturers with a unique range of standard and customised automation solutions.

We offer technical support, feasibility trials and product training from our experienced application engineers at our dedicated Robot Lab. We are also a Universal Robots Certified Training Academy where we can provide tuition in cobot programming.

We have built our reputation on giving our customers straightforward, practical, technical advice and recommend products that work together to meet their needs.
