

Adapter

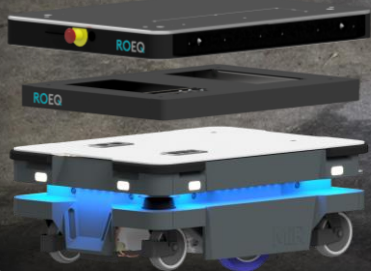

## AM250

AM250 is an adapter that allows the MiR250 to be compatible with ROEQ products/ top modules that are already working with MiR100/200. Flexibility is added to your facility with the possibility to use up to 4 of ROEQ's existing top modules.

### Features

By adding the AM250 between the MiR250 robot and a top module, the height is the same as the MiR100/200 with a top module. In this way you get the opportunity to add the MiR250 to your current fleet with all your existing ROEQ applications - like a Cart300 solution:

- + TMC300
- + AM250
- + MiR250

ROEQ top modules
