

Protection Cover for Universal Robots

Drim Robotics

HOW DOES IT WORK?

Manufactured from shock absorbing, chemical resistant, Elastomer, our Protection Cover guards the teach pendant from extreme manufacturing conditions and accidental falls up to 2,80 m.

Protection Cover protects the exposed components most often damaged when the pendant hits the ground. With its unique design Protection Cover are made to increase the safety of the teach pendant without drastically modify their shape and functionality. Protection Cover is like a warm hug, its design is accurated to bring strength just where is needed leaving to user comfort of use.

We produce also Protective Film for Touch Screen Teach Pendant to prevent from damage, dirty and risk of loss production, as well as with the use of Protection Cover. Find us at <http://tpsavers.com>

Technical Details

Includes a URcap plugin: N/A

Compatibility: UR3, UR5, UR10, CB2, CB3.0, CB3.1

Software version required: N/A

Dependency: N/A

Certifications and standards: N/A

Dimensions: Suited for CB2 and CB3 TP. Weight: 500g

What's in the box: One Protection Cover in Elastomer, documentation.

License type: One-time Purchase

Features and Benefits

- + Tested protection from drops up to 2.80 m certified by Akademia Techniczno-Humanistyczna w Bielsku-Bialej
- + Easily access to all pendant features
- + Ergonomic and lightweight
- + Easy installation
- + Silicon Free Certified

SUITED FOR THE FOLLOWING APPLICATIONS

- + All categories
